

# Virtual Hospitalist Program

TOGETHER, WE HEAL

SCP Health's virtual hospitalist program provides remote hospitalist support for new and existing hospital medicine departments. Our virtual hospitalists take floor and ED calls, admit, discharge, round on patients, and deliver exceptional bedside care.

## Experienced Clinicians

Board-certified hospitalists, housed in a remote, HIPAA-compliant space, perform physical examinations, with assistance from a nurse, and communicate directly with patients and hospital staff via a user-friendly, state of the art mobile telemedicine cart.

## Operational Support

Our dedicated team aligns with your program goals and provides telemedicine onboarding, training, and 24/7 ongoing technical support.

## Customized Services

Flexible coverage models match your needs, offering virtual hospitalist services for nocturnists, surges, extended time off, specialty admission, supervision, medical consults, and extended coverage gaps.

## Team Consistency

A team of virtual hospitalists is assigned to each program, allowing in-person clinicians and staff to build relationships and rapport with their virtual counterparts.
