

Virtual Triage Program

TOGETHER, WE HEAL

SCP Health's virtual triage program provides remote provider-in-triage (PiT) support for emergency medicine departments. Our virtual triage clinicians work with the triage nurses to examine patients, initiate orders, complete patient workups, and deliver exceptional emergency care.

Experienced Clinicians

Emergency medicine clinicians, housed in a remote, HIPAA-compliant space, perform physical examinations, with assistance from a nurse, and communicate directly with patients and ED staff via a user-friendly, state of the art mobile telemedicine cart.

Operational Support

Our dedicated team aligns with your program goals and provides telemedicine onboarding, training, and 24/7 ongoing technical support.

Customized Services

Flexible coverage models match your needs, offering virtual triage services for nocturnists, surges, extended time off, specialty admission, supervision, medical consults, and extended coverage gaps.

Team Consistency

A team of virtual triage clinicians is assigned to each program, allowing in-person clinicians and staff to build relationships and rapport with their virtual counterparts.
